HFS extended journaled is the same as MacOS extended (journaled) That is, until you get yours installed -- at which point APFS will become the normal format for Mac drives.. 12 Sierra USB install drive Ars Technica If it had been shipped to you and was still an NTFS drive, it would likely NOT be seen as a candidate for Install, which is a bump in the road at the point when you want to just tell it to GO.

Thought Id maybe do Sierra instead I could find it), but then since Im doing a clean install I might as well go all the way, right.

As macjack says, you can do it right in the running (older version of) MacOS But there is a need to initialize your new SSD to the default GUID partition Map and HFS Volume, so that it will appear empty and AVAILABLE for the Installer.. Didnt feel comfortable using the tool they describe above, but wonder if this is part of the issue. [تحميل برنامج وورد 2019 عربي مجاني](#)

If you prefer, you can stop the Installer right after it finishes the download, and create an Installer USB stick.. I know that the newer versions of macOS after Sierra use the Apple File System, and I was wondering if there would be any compatibility issues if I upgraded my SSDs installation of macOS Do I need to upgrade both the main HDD and the external SSD to a newer version of macOS If I were to upgrade the SSD to a newer version of macOS that uses the Apple File System but not upgrade the internal HDD would it screw things up Im really not sure so I thought Id come here.. Backup Software High Sierra And External Ssd Update My FirmwareBackup Software High Sierra And External Ssd Software Testing ProgramOr if you could just point me in the right direction thats great too:) Thanks 4 comments share save hide report 100 Upvoted Log in or sign up to leave a

comment log in sign up Sort by best level 1 Mac Mini 2 points 4 months ago No, and you shouldn't upgrade the HD to APFS, as APFS is meant for SSDs. [A Deleted Event On Outlook Calendar For Mac Keeps Popping Up As A Reminder](#)

If someone could give me a basic rundown of exactly what I'd need to do to upgrade my Mac (preferably to macOS High Sierra) I would really appreciate it.. Backup Software High Sierra And External Ssd Software Testing Program Then do not participate in the public Beta software testing program.. My current drive is still running Yosemite, so was planning to do a clean install of High Sierra on the new drive, and then migrate my data from the existing drive to the new SSD.. My Mac mini has an internal SSD running Mojave APFS while my external HD is using HFS.. Also, since my current drive is running Yosemite, it seems that is what OS Recovery would install.. Related to your last point with this new file system, should I be fearful of going all the way to High Sierra on this old a Mac This is my main work computer, and I don't need any major headaches.. But I am in a building with a shared wifi, and apparently there are limitations to what type of wifi security works with internet recovery.. This article explains how: Create a bootable installer for macOS - Apple Support there are a few little Utilities that can help if you find Terminal overwhelming: How to make your own bootable macOS 10. cea114251b [تنزيل برنامج تورنت عربي 2019](#)
